

At Excel Orthopedics, we will not see a patient under the age of 18 years old without a parent or guardian accompanying them to their initial visit, any visit discussing surgery and first post op visit.

For all other visits, a patient between the ages of 16 and 18 may come alone for their appointment with a signed consent from their parent or guardian.

**authorization**

I am authorizing Dr. Lenarz and his personnel to deliver routine medical treatment and services to my child. Routine medical care and interventions may include, but are not limited to: medical evaluation, physical exam, x-rays, lab work, and injections.

If further outside testing or surgery is indicated, scheduling will be delayed to allow my assistance in the decision making process.

_____	_____
patient's name	date of birth

_____	_____
parent of guardian	date

_____	_____
relationship to patient	phone number
